

THE PINNACLE ADVANTAGE

As the need for private duty homecare has increased and the industry continues to grow, many homecare providers have flooded the market in recent years. From large corporations to the franchise model. Pinnacle Home Care Solutions is neither of those.

We are not a large corporation where the quality of care is often lost to a focus on higher revenues and increased profit margins. We are not a franchise where flexibility in services and the service area can be limited. Too often, we have seen an assembly line approach to how clients are served and how caregivers are hired. Instead of focusing on delivering quality care and employing quality caregivers, many homecare companies define success by servicing as many clients as they can when they are not prepared or equipped to do it successfully.

Our success is not defined by being the biggest provider in our market. Our success is defined by being the best.

ABOUT US

Pinnacle Home Care Solutions was founded to provide a refreshing alternative to the way home healthcare is delivered. Our mission is to provide care in a responsible, dignified and transparent way.

We believe our caregivers are the backbone to our success. Therefore, our primary focus is employing qualified, competent and compatible caregivers for placement in a home or community setting. We also understand how important it is for the client to be an active participant in the caregiver selection process and the care they receive. We approach our customer relationship as a partnership that requires ongoing dialogue and feedback between the client, caregivers and administrative staff to optimize the best outcomes for every client we serve.
